Disinformation
Index

Overview

A global civil discourse map that allows the user to access worldwide information about the level of civil disarray in a chosen country anywhere on the map.

Map Implementation

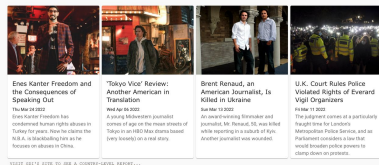

Color-coded global map that allows viewers to see how the civil discourse rating for each country compares to each other. A popup menu when clicking on a country provides further access.

Country Information Pages

Country pages provide excess details on a country's specific civil discourse rating, population, media access, censorship, ect...

- Recent Headlines -

Relevant news articles regarding a country's political climate are displayed along with button links to GDI's website for more details.

Global Rankings

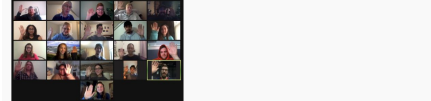

A global civil discourse rankings page that allows the user to access information about the differences in each country displayed in a multi-columned table.

Country	Ranking	Population	Internet Access	Online Community Level	Reporting M.O. Readers Ranking	Literary Rate
United States	22	332,639,102	87%	1	44	99%
China	1	1,402,000,000	65%	1	1	100%

Contributors

This project began in the summer of 2020, when Professor Nicholas Lowenstein and Professor Editor-In-Chief Nicholas Lowenstein began building up and entering information about each country's national and international presence of press and media freedoms.

The 2020 class taught by Professor Jeff Lowenstein contributed all of the information used in the Civil Discourse Map. We would like to recognize each student in the class, the seven computer science students who worked on the web application, and Computer Science Professor Jonathan Engstrom.

An 'About' page that describes the ins and outs of this website as well as acknowledges the teams who have contributed to the website since the year 2020.

Technical Specifications

Professor Lowenstein required the map to have each country page to have:

- Curated Headlines
- Impartial Data
- Interviews
- Journals (delayed)

*Required to expand countries to all english speaking countries

Future Implementations

- Machine Learning headline filter
- Modernize map interaction
- Data access streamlining
- GDI journals

Acknowledgements

We would like to thank Professor Lowenstein and the GDI for giving us the opportunity to learn and work on this project!
